

Make a Zine!

What you need: a sheet of 8.5x11 paper, scissors, and whatever you want to use to illustrate or write!

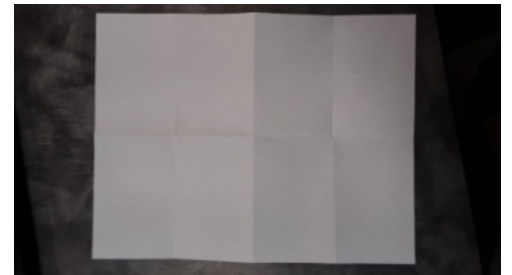

1. Fold your sheet of paper the long way, bringing short ends together. Make really good sharp creases for best results!

2. Turn paper and repeat (bring short ends together).

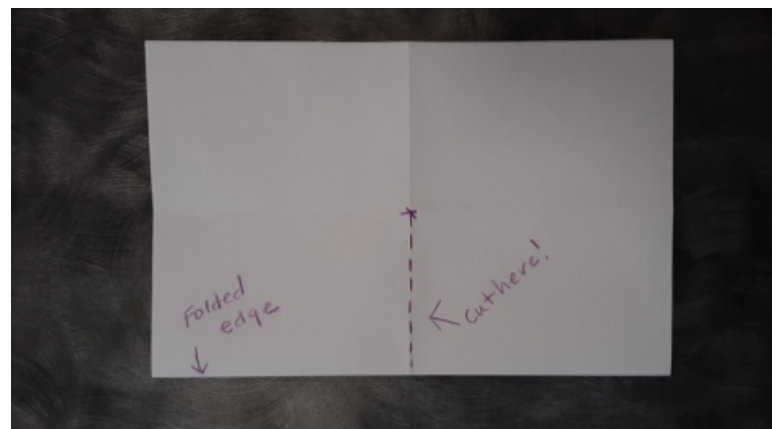

3. Turn your paper again, and repeat.

4. Now unfold your paper completely. You should have 8 rectangular folded-off sections.

5. Re-fold your paper in half, like a book.

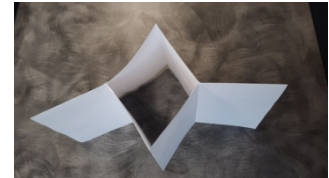

6.
7. Now use your scissors: with the paper folded, make a single cut through both layers from the folded edge to the center where your four creases meet.

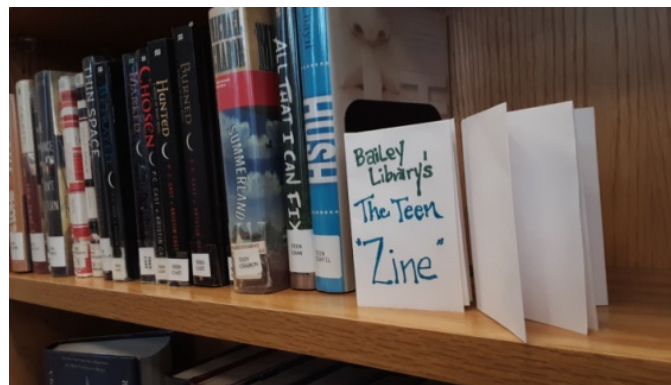

8. Now, unfold. You will have a hole in the middle.

9. Fold your paper the LONG way, now, so the fold is along one edge. Let the cut edges stick out a little.

10. Now, push them together to make an "X". Then flatten them – your Zine is ready for you to write or draw in!

11. Traditional zines don't have fancy covers – but you can staple one on (staple in the fold) if you like!

Have fun!
